

Pest Pro 150

Bug Light

The dual-bulb design of the Pest Pro 150 Bug Light from Curtron Products effectively covers up to 1,800 square feet from flying insects. Pests are attracted by powerful ultraviolet (UV) light and trapped on a replaceable glue board. This eliminates the hum and crackling of "bug zappers" as well as their unsightly mess.

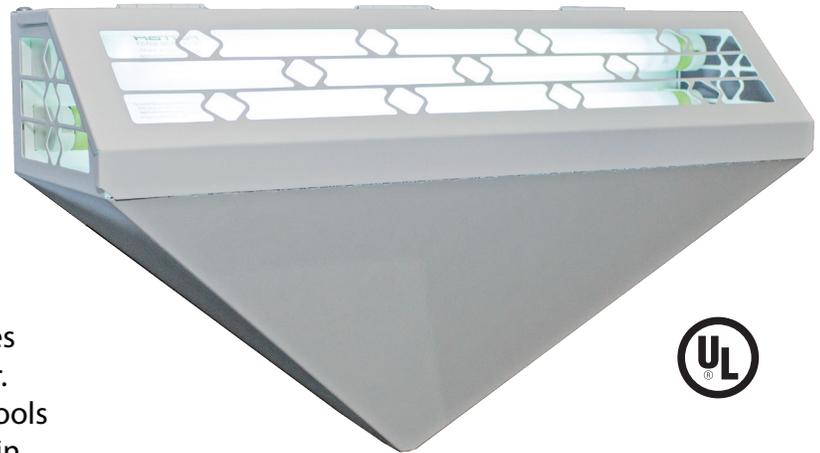

The wall sconce design and choice of four finishes means there is a Pest Pro 150 to match any decor. Installation is simple, requiring only basic hand tools and all Pest Pro bug lights are "quick ship" items, in stock and ready to ship upon purchase.

FEATURES

- Silent, mess-free operation
