Flav-R-Savor® Heated Air Curtain Cabinets

Model: FSHAC-2, -3,
FSHACH-2, -3, -2PT

The patented Hatco Flav-R-Savor® Heated Air Curtain Cabinet effectively and safely holds hot food hot without the use of doors, allowing immediate access to product. Warm air at the front of the cabinet is forced downward, through ducts above the opening, forming a “curtain” of heated air. A portion of the heated air is drawn toward the rear through special perforations on the back wall, warming each pan. The patented Hatco Heated Air Curtain Cabinet is ideal for holding wrapped products like tortillas, burritos and ribs, as well as products on sheet pans like biscuits, chicken, hamburger patties, pizza and baked potatoes. Holding temperatures range from 80°F to 175°F (27°-79°C).

Standard features

- Choose from 2-pan and 3-pan units, single opening or pass-through, with or without humidity. Humidified models can be filled manually or with the auto-fill feature
- Heated Air Curtain Cabinet effectively and safely holds hot food hot without the use of doors, allowing immediate access to product
- Standard units hold half-size sheets pans (one per shelf) and the 2-pan pass-through model accommodates two full-size sheet pans

Accessories

- 4" (102 mm) Legs (Standard on 3-tier models)

WATER QUALITY REQUIREMENTS

Incoming water in excess of 3.0 grains of hardness per gallon (GPG) (.75 grains of hardness per liter) must be treated and softened before being supplied to booster heater(s). Water containing over 3.0 GPG (.75 GPL) will decrease the efficiency and reduce the operating life of the unit.

Note: Product failure caused by liming or sediment buildup is not covered under warranty.
